The European Digital Portfolio for University Student (EDIPUS DPP) and the data base hosting portfolios (EDIPUS DDP) is completed and available for students and for Universities to use it

The European Association of ERASMUS Coordinators (EAEC) and the EDIPUS partners hope to make an impact on the employability opportunities of university students in Europe but also in the digital learning developments and modernization of higher education systems. Students have a free tool available to them so they can strengthen their professional profiles. Furthermore, employers are now able to view profiles of prospective job candidates with a more transparent method. Universities or individual professors could now make EDIPUS a tool in the learning process of their lesson or departments could make EDIPUS a requirement for use by all students in their department, supporting the development of ICT skills for their students while contributing to digital learning and paperless approaches.

The Project Main Outputs are listed here below. All of them are available as independent portals or listed for downloading in the outputs listing of the project website.

- 01.** Needs Analysis Report for the Digital Portfolio Portal
- 02.** The Digital Portfolio Portal (DPP)
- 03.** Digital Portfolio Database (DDP)
- 04.** Digital Portfolio User Guidebook
- 05.** EDIPUS Training Course for University Students and Officers supporting students
